

Knowledge of foreign languages, understanding of each other's cultures and multinational cooperation are skills that are becoming increasingly important.

We are a catholic school located in Orléans (central France) focusing on developing a sense of belonging to European culture and citizenship.

We offer European classes to boys and girls from the age of 11 to 18 based on extended work in English from the fourth year at Collège in the form of two additional lessons per week.

At Lycée, the intensive language lessons are continued with one extra lesson in the foreign language and with an additional lesson in a content subject taught through the English language. This subject can be Physics, Chemistry, History or Geography.

Extra curricular activities are also part of our program.

Students attending these classes are motivated and keen on studying the English language.

We wish to set up an exchange program or any type of exchange with any foreign country eager to use English or French as a means of communication with our students.
